

Demo Scripts

CLI scripts to demonstrate basic NodeJS functions

Goal

Show that you can call the APIs to do the necessary using command line scripts. This won't be used.

Requirements

Requirements

1. Push code daily to [THIS](#) repo
2. Have tests to support each verb or action (login / webhooks / button click etc)
3. Clean well organised NodeJS class structure with functions for each test.
4. Demo using localhost
5. Show with example how to use test code.
6. Store intermediate data on disk
7. Save temporary data to files

Functions: Demo and test each of these

Do the following with command line scripts. If you need a front end it can be as minimal as you can imagine.

1. Use the Stripe Connect in Sandbox mode using command line scripts :
 - a. Connect a merchant account [API](#)
 - b. Accept stripe test cards
 - c. move (test) money from Buyer -> Stripe -> Seller
2. Use existing IG code in repo in lib/ig
 - a. Write down steps needed to log in user
 - b. Use a token saved in file to get a list of media by user.
 - c. Use [THIS](#) api to list user's media.

Qualifications

1. Ability to understand API docs
 - a. I've shown the API docs for 1a. Please locate API docs on the web for the rest of the functions.
2. Experience with NodeJS
